

Patent Information Analyst

AGFA-GEVAERT, HQ, MORTSEL ACCESSIBLE BY BICYCLE OR PUBLIC TRANSPORT

Your mission

You, as an Information Analyst are responsible for searching, analyzing and distributing scientific and patent related information, related to Agfa's domain in chemical activities (printing plates, inkjet and conductive inks, PV Backsheets), Your efforts will contribute Agfa's R&D work and Agfa's patent asset, to assess the validity of competitors' IP rights and infringements.

More detailed:

- Create and manage automatic search profiles to detect new IP applications of our competitors. R&D will give you the technical based input that you translate into search terms.
- Perform searches in external databases and other information sources. (Literature, internet, ..)
- Analyze and distribute your search results to your internal customers (R&D, IP Attorneys)
- Patent mapping
- Organizing and managing information meetings with representatives of IP and R&D departments.

Profile

We are looking for a Bachelor in Chemistry with the following qualifications:

- You have broad knowledge of chemistry, more specifically in the Agfa specific domains such as colloid chemistry, polymers, pigments, ..)
- You have basic knowledge of MS office and experience in using databases.
- Being familiar with IP law is an added value, an interest in discovering this world is a must.
- Interested or experienced in patent searching

Who are you?

- You have an analytical mindset, you are accuracy and goal oriented.
- You have good communication and networking skills
- Proficient in English, basic knowledge of French/ German/ Asian languages an advantage

Our offer

We offer an interesting environment, an experienced team and opportunities to further develop. You will receive a competitive salary with fringe benefits.

Are you passionate by Chemistry and looking for an interesting position within a technology driven environment?

Do you like to work with R&D and Patent-attorneys?

Do you have experience or interest in further growing in this IP environment?

Do you enjoy searching the needle in the haystack?

Then you are the Patent Information Analyst that we are looking for!

If you want to be part of this experience?
"we'll take you there".
